Evidence packets

A print-ready packet of suppressed aggregates with sources and dates. Use Print / Save as PDF to produce the file.

DRAFT · FOR REVIEW

FAS Evidence packet · Grant attachment · Statewide

Prepared Oct 2026 · Data as of Sep 2026

1. County need profile
2. FAS results
3. Outcomes
4. Methodology and sources
5. Suppression note
6. Related-party disclosure

SECTION 1 OF 6 · COUNTY NEED PROFILE

Highest-need Utah counties on the FAS need score (version v2-synthetic; 29 of 29 counties scored): Piute County (rank 1 of 29), Uintah County (rank 2 of 29), Sanpete County (rank 3 of 29), Millard County (rank 4 of 29), Washington County (rank 5 of 29).

Public sources: Census SAIPE, ut_courts, Census ACS 5-year, Census SAHIE · Need score version v2-synthetic · as of Oct 2026 · Placeholder bins

SECTION 2 OF 6 · FAS RESULTS

No court-ordered case reached a first session this quarter.

Funding decisions took a median of 7 days from application, the same as the quarter before.

The share of approved families who never started therapy is hidden because it rests on fewer than 11 families.

Each completed course of therapy cost $487 on average, $30 higher than the quarter before.

Across all income bands, 87% of closed cases finished therapy (33 of 38); bands with fewer than 11 cases are hidden.

49% of therapy dollars went to providers affiliated with FAS, at an average of $102 per hour versus $102 for other providers.

Days from court order to first session

FAS records · Jul–Sep 2026 (Q3) · as of Sep 2026

SECTION 3 OF 6 · OUTCOMES

Fewer than 11 families had PHQ-9 follow-up scores, so that change is hidden.

On the GAD-7, scores changed by +0.7 on average and 23% of families improved (lower is better).

Lower scores are better on every active instrument; change is follow-up minus baseline.

PHQ-9 mean change

FAS records · Jul–Sep 2026 (Q3) · as of Sep 2026

Need score version v2-synthetic, approved Oct 2026: a weighted score of the public inputs below (weights sum to 1).

Synthetic placeholder weights are in use.

FAS results cover Jul–Sep 2026 (Q3) and compare to the quarter before. Metric definitions follow the FAS Evidence methodology (M1–M6, O1); suppression follows the rule in the suppression note.

Sources: Census SAHIE (2024, as of Oct 2026); FAS records (as of Sep 2026).

SECTION 5 OF 6 · SUPPRESSION NOTE

Counts under 11 are hidden, with complementary suppression so a hidden value cannot be recovered from totals or other cells.

Rates, medians and changes built on a hidden count are hidden too.

Geography is county-level only. Dates are shown by month or quarter, never exact dates. This packet contains no case-level records, clinical notes, diagnoses, substance-use details or court documents.

FAS Evidence privacy rules

SECTION 6 OF 6 · RELATED-PARTY DISCLOSURE

FAS pays its sister practice, Connections Counseling Services, for some of the therapy it funds.

The share of therapy dollars going to affiliated providers is always shown with the average hourly rate for affiliated and other providers.

49% of therapy dollars went to providers affiliated with FAS, at an average of $102 per hour versus $102 for other providers.
